RESOLUTION

ON THE

Report on the Prison Administration of Burma

FOR THE YEAR 1929.

Extract from the Proceedings of the Government of Burma (Judicial Department),—No. 102Z30, Part I, dated the 2nd August 1930.

READ—

The Report of the Inspector-General of Prisons on the Administration of Prisons in Burma during the year 1929.

RESOLVED THAT—

The Report be published.

By order of the Governor in Council.

TUN YA,

Offg. Secretary to the Govt. of Burma, Judicial Department.

[NOTE.—Figures for the previous year are shown in brackets.]

REPORT

ON THE

Prison Administration of Burma

For the Year 1929.

CHAPTER I.

JUDICIAL.

The year opened with 8 Central Jails, 22 District Jails, 2 Camp Jails and 2 Subsidiary Jails, or a total of 34 ; but, at the close of the year, there were altogether 35 jails, the increase being accounted for by the Subsidiary Jail at Pakôkku having been handed over to the Prison Department on the 8th February 1929. With effect from the 1st August 1929 a second Camp Jail, capable of accommodating 1,100 convicts, was opened at Môkpalin where prisoners are employed on working the Government stone quarries ; but, for statistical purposes, the two camp jails there are grouped together and shown as Môkpalin Camp Jails No. I and No. II. *vide* the appendices to this Report. The Police lock-ups at Pyapôn and Mawlaik will be taken over by the Prison Department on completion of the necessary buildings to meet the requirements of a subsidiary jail. The subsidiary jail at Pegu still remains under police control. The Local Government have approved the preparation of a line plan and preliminary estimate for the construction, outside the town limits, of a new subsidiary jail at Pegu, the planning of which is held in abeyance pending receipt of orders as to the nature of the accommodation to be provided for under-trial prisoners as a result of the discussions which ensued at the Conference held at New Delhi in December 1929. A scheme for constructing an institution at Meiktila, capable of serving as a hospital for a hundred tubercular patients and a hundred leper prisoners, has been approved by the Local Government ; but owing to the dearth of funds it will take some time for this institution to materialize. Meanwhile, the Department will have to content itself with the meagre accommodation for fifty-two tubercular patients available at the Myingyan Central Jail and the small leper jail at Pagan will continue to function as such.

General Summary.

2. *Distribution of Prisoners of all Classes.*—The number remaining at the close of the previous year was 21,272 (20,204) and the number received during the year was 55,044 (53,125), making a total of 76,316 (73,329).

The number discharged from all causes being 56,595 (52,057), there remained at the close of the year 19,721 (21,272). The total daily average for the year was 19,956 or 688 less than in the previous year.

3. *Admission and Disposal of Convicts.*—The year opened with 19,821 (18,517) and 22,864 (23,146) were committed to jail during the year, making a total of 42,685 (41,663). Excluding transfers to other jails which numbered 11,523 (9,206), the disposal of convicts is accounted for as follows :—

Statement I.

Released (*a*) on appeal 1,953 (2,212), (*b*) on expiry of sentence 8,432 (8,507), (*c*) under the remission rules 9,230 (9,608) ; released by order of Government (*a*) on account of sickness 54 (30), and (*b*) on other grounds 2,991 (775) ; sent to Port Blair having volunteered for employment there 825 (139) ; transferred to Mental Hospitals 27 (8) ; escaped but not recaptured 6 (9) ; executed 76 (84) and died 527 (489). The number remaining at the close of the year was 18,297 (19,821). The daily average was 18,511 or 636 less than in the previous year. The 2,991 releases, effected by order of Government, on other grounds, are made up of 1,318 well-conducted prisoners released, on the 2nd January 1929, under the jail delivery scheme, 1,188 conditionally liberated on the recommendation of the Central Revisory Board, 368 for ticket-of-leave employment under the Public Works Department, 64 for repatriation to China, 35 transferred to the Salvation Army Juvenile-Adult Criminal Institution, and 7 under the " fourteen years' rule ," the remaining 11 being miscellaneous other releases.

4. *Religion, Age, Education and Previous Occupation of Convicts admitted to jail during the year.*—

Statement II.

(*a*) *Religion.*—Of 22,864 admissions 84·27 per cent. were Buddhists, 4·56 per cent. were Mahomedans, 4·43 per cent. were Hindus and Sikhs and 0·45 were Christians, all other denominations accounting for 6·29 per cent. These ratios vary but slightly from those for the previous year.

(*b*) *Age.*—It is satisfactory to note that the number of convicts under 16 years of age sent to jail fell to 90 (143), but even this number is unduly high and, as pointed out in the report for the year 1928, matters can only be remedied by the early introduction of the Probation System and Training Schools. The same remark is applicable, more or less, to convicts whose ages ranged from 16 to 21 and who numbered 3,121 (3,897). Compared with the preceding year, the other three categories show an increase which is most marked among prisoners aged 22 to 30 and 31 to 40.

(*c*) *Education.*—Of the convicts admitted to jail during the year 71·85 (78·45) per cent. were literate and 28·15 (21·68) per cent. illiterate. For the fourth year in succession the experiment of secular education, by means of paid teachers, was carried out in five of the central jails, for each of which one paid teacher, selected by the Education Department, was sanctioned. The curriculum embraced reading, writing, simple arithmetic, elementary [illegible] with lectures. Attendance [illegible] and optional for [illegible] were held [illegible] Schools [illegible] soon [illegible]

mentioned that under orders received from the Local Government in April 1929 all sentences of solitary confinement are now executed as though they were sentences of cellular confinement ; in other words, a prisoner awarded a sentence of solitary confinement is lodged in a cell which entirely secludes him from communication with, but not from sight of, other prisoners. No period of such confinement exceeding fourteen days, or, if the imprisonment is for more than three months, exceeding seven days, is inflicted in any one calendar month. As required by rule, every prisoner confined in a cell for more than twenty-four hours is visited at least once a day by the Medical Officer or the Medical Subordinate.

As regards length of sentences, there was an increase under all the heads except four, *viz.*, above one month and not exceeding three months 2,732 (2,856), above three and not exceeding six months 5,649 (6,064), above six months and not exceeding one year 4,440 (5,016), and those sentenced to transportation for life 161 (176). The number sentenced to death was 152, against 136 in 1928. The number remaining at the close of the year was 18,297 (19,821).

6. *Number of Recidivists.*—Reconvicted prisoners numbered 7,130 (6,892), yielding a percentage of 31·18 (29·78). Of this number, 1,040 (883) were committed to jail for the first time in default of finding security under section 110 of the Criminal Procedure Code. As regards the remainder 2,054 (1,862) had one previous conviction, 1,874 (1,826) had two previous convictions and 2,162 (2,321) had more than two previous convictions. The number classified as habituals by Jail Superintendents was 62, against 101 in 1928 and 139 in 1927 ; this would appear to indicate greater care on the part of criminal courts in deciding the important question as to whether an offender is a habitual or not.

Statement IV.

7. *Escapes and Recaptures of Convicts.*—A satisfactory feature of the year is that there was no escape from inside the jail. Twenty-eight prisoners absconded while employed extramurally and, of these, twenty-two were recaptured before the close of the year. The departmental enquiry held in each case went to show that, with few exceptions, carelessness in the guarding arrangements was responsible for the escapes. The subordinates at fault were

Statement V.

The number discharged from all causes being 56,595 (52,057), there remained at the close of the year 19,721 (21,272). The total daily average for the year was 19,956 or 688 less than in the previous year.

3. *Admission and Disposal of Convicts.*—The year opened with 19,821 (18,517) and 22,864 (23,146) were committed to jail during the year, making a total of 42,685 (41,663). Excluding transfers to other jails which numbered 11,523 (9,206), the disposal of convicts is accounted for as follows :—

Statement I.

Released (*a*) on appeal 1,953 (2,212), (*b*) on expiry of sentence 8,432 (8,507), (*c*) under the remission rules 9,230 (9,608) ; released by order of Government (*a*) on account of sickness 54 (30), and (*b*) on other grounds 2,991 (775) ; sent to Port Blair having volunteered for employment there 825 (139) ; transferred to Mental Hospitals 27 (8) ; escaped but not recaptured 6 (9) ; executed 76 (84) and died 527 (489). The number remaining at the close of the year was 18,297 (19,821). The daily average was 18.511 or 636 less than in the previous year. The 2,991 releases, effected by order of Government, on other grounds, are made up of 1,318 well-conducted prisoners released, on the 2nd January 1929, under the jail delivery scheme, 1,188 conditionally liberated on the recommendation of the Central Revisory Board, 368 for ticket-of-leave employment under the Public Works Department, 64 for repatriation to China, 35 transferred to the Salvation Army Juvenile-Adult Criminal Institution, and 7 under the " fourteen years' rule ," the remaining 11 being miscellaneous other releases.

4. *Religion, Age, Education and Previous Occupation of Convicts admitted to jail during the year.*—

Statement II.

(*a*) *Religion.*—Of 22,864 admissions 84·27 per cent. were Buddhists, 4·56 per cent. were Mahomedans, 4·43 per cent. were Hindus and Sikhs and 0·45 were Christians, all other denominations accounting for 6·29 per cent. These ratios vary but slightly from those for the previous year.

(*b*) *Age.*—It is satisfactory to note that the number of convicts under 16 years of age sent to jail fell to 90 (143), but even this number is unduly high and, as pointed out in the report for the year 1928, matters can only be remedied by the early introduction of the Probation System and Training Schools. The same remark is applicable, more or less, to convicts whose ages ranged from 16 to 21 and who numbered 3,121 (3,897). Compared with the preceding year, the other three categories show an increase which is most marked among prisoners aged 22 to 30 and 31 to 40.

(*c*) *Education.*—Of the convicts admitted to jail during the year 71·85 (78·45) per cent. were literate and 28·15 (21·68) per cent. illiterate. For the fourth year in succession the experiment of secular education, by means of paid teachers, was carried out in five of the central jails, for each of which one paid teacher, selected by the Education Department, was sanctioned. The curriculum embraced reading, writing, simple arithmetic, elementary geography, history and a short series of health lectures. Attendance was compulsory for prisoners under twenty-five years of age and optional for others. The daily tuition lasted 45 minutes and classes of limited numbers were held in rotation. The schools were inspected by the respective Circle Inspectors of Schools and the results have so far been satisfactory. It is hoped that the time will soon arrive when the financial state of the province will permit of this system of education being extended to the remaining three central jails and at least the larger district jails.

(*d*) *Previous Occupation.*—Compared with the year 1928 there has been a fall under all the heads except male agriculturists, traders and mechanics, *vide* columns 6, D, E and F, respectively. More married and unmarried females were received in jail during the year, while the figures for widows and prostitutes were a trifle lower. It is not possible for me to explain these fluctuations.

5. *Nature and length of Sentences and the number remaining.*—There was a decrease in the number sentenced to simple imprisonment 1,174 (1,384), to rigorous imprisonment 20,396 (20,933) and to rigorous imprisonment with solitary confinement 287 (373), but a substantial rise from 456 to 1,007 in the number sentenced to rigorous imprisonment with whipping. It may here be

Statement III.

mentioned that under orders received from the Local Government in April 1929 all sentences of solitary confinement are now executed as though they were sentences of cellular confinement ; in other words, a prisoner awarded a sentence of solitary confinement is lodged in a cell which entirely secludes him from communication with, but not from sight of, other prisoners. No period of such confinement exceeding fourteen days, or, if the imprisonment is for more than three months, exceeding seven days, is inflicted in any one calendar month. As required by rule, every prisoner confined in a cell for more than twenty-four hours is visited at least once a day by the Medical Officer or the Medical Subordinate.

As regards length of sentences, there was an increase under all the heads except four, *viz.*, above one month and not exceeding three months 2,732 (2,856), above three and not exceeding six months 5,649 (6,064), above six months and not exceeding one year 4,440 (5,016), and those sentenced to transportation for life 161 (176). The number sentenced to death was 152, against 136 in 1928. The number remaining at the close of the year was 18,297 (19,821).

6. *Number of Recidivists.*—Reconvicted prisoners numbered 7,130 (6,892), yielding a percentage of 31·18 (29·78). Of this number, 1,040 (883) were committed to jail for the first time in default of finding security under section 110 of the Criminal Procedure Code. As regards the remainder 2,054 (1,862) had one previous conviction, 1,874 (1,826) had two previous convictions and 2,162 (2,321) had more than two previous convictions. The number classified as habituals by Jail Superintendents was 62, against 101 in 1928 and 139 in 1927 ; this would appear to indicate greater care on the part of criminal courts in deciding the important question as to whether an offender is a habitual or not.

Statement IV.

7. *Escapes and Recaptures of Convicts.*—A satisfactory feature of the year is that there was no escape from inside the jail. Twenty-eight prisoners absconded while employed extramurally and, of these, twenty-two were recaptured before the close of the year. The departmental enquiry held in each case went to show that, with few exceptions, carelessness in the guarding arrangements was responsible for the escapes. The subordinates at fault were suitably dealt with. On the advice of his father, a prisoner of the Magwe Jail, who absconded while employed in the jail garden, surrendered himself to the jail authorities. On being sent up for trial, he was, in consequence, awarded a light sentence of 4 months under section 224 of the Indian Penal Code.

Statement V.

8. *General Behaviour of Prisoners.*—The number of offences dealt with by Criminal Courts, was 54, against 113 in 1928. There was an appreciable decrease in the

Statement VI.

number of offences relating to (1) prohibited articles 2,054 (2,485), (2) assaults, mutiny and escapes 560 (772), and (3) all other breaches of jail rules 5,575 (6,813) ; but the number of offences relating to work rose from 3,488 in 1928 to 7,250 in the year under review. The Alon Camp Jail, with a daily average population of 420, contributed 4,820 towards the total number of offences relating to work. This, however, is no reflection on the administration of the jail concerned. The explanation is that the present Superintendent, Khan Sahib Shaik Abdul Rahim, will not allow any slacking and idling. Only able-bodied prisoners in good health and whose ages range from 21 to 35 are sent to Camp Jails. At these jails the prisoners, on arrival, are allowed reasonable time in which to acquire the skill necessary to complete the allotted task in stone-breaking. But the experience at Alon has been that large numbers of convicts shirk work, and the Superintendent could not help taking suitable steps to deal with the evil, warnings having proved ineffectual in several cases. It is a well-known fact that free labourers get through much more stone-breaking work daily than is required of the prisoners employed at the quarries.

The number of minor punishments awarded was 10,345 (7,896), all the heads showing an increase except penal diet with or without cellular confinement not exceeding forty-eight hours, under which head the awards fell by 66. On the other hand, the major punishments inflicted fell from 5,662 in 1928 to 5,094 in the year under report, all the heads exhibiting a decrease except " Other punishments " which rose from 2,171 to 2,315. The ratio per cent. of minor punishments and of major punishments to the daily average convict population was 56 (41) and 28 (30), respectively, the ratio of the grand total of punishments being 84 (71). The awards of whipping, compared with the grand total of punishments, were 0·45 (0·55) per cent.

Of the 54 cases dealt with by criminal courts, 24 related to serious assaults, 22 to escapes and 8 were for attempted outbreak. Of 24 assaults, 10 were committed on members of the staff including 4 paid warders, 3 on convict officers and 11 on fellow prisoners. The following is a brief account of the three assaults which proved fatal :—

(1) *Rangoon.*—While a prisoner was engaged in planing wood, another prisoner came up from behind and stabbed the former twice on the neck, the weapon used being a chisel. The injured man, who became unconscious, was placed on a chair for removal to the Jail Hospital, but died on the way. The two prisoners appeared to have been on friendly terms, and the motive for the assault was obscure. The offender was sentenced to death and, in due course, paid the penalty.

(2) *Bassein.*—While employed on coir pounding, a convict struck a fellow prisoner on the head, using for this purpose a mallet. The injured man was removed to the Civil Hospital for surgical treatment, but died there on the same evening. At the departmental enquiry into the case, it was found that the deceased had, in the earlier part of the day, abused the assailant and removed a portion of his cleaned coir. The latter prisoner, on being sent up for trial, was awarded ten years under section 304, Indian Penal Code.

(3) *Sandoway.*—A convict overseer in charge of the cane-work and soorki pounding gang approached a convict night-watchman who was busy with some carpentry work and did not notice the man. Using a scantling 2″ × 1″ × 36″, the convict overseer gave the convict watchman three or four blows on the head. The injured man was promptly attended to, but died the following morning. The motive for the assault was said to be an old grudge which they bore each other while detained in the Akyab Jail. On being sent up for trial, the offender was acquitted by the Sessions Court on the ground that he did not exceed the right of private defence.

But for the large increase of 3,762 under the head of " Offences relating to work " there has, when compared with the previous year, been a general improvement in the behaviour of the convict population, this being mainly accounted for as follows :—

The prisoners are well aware of (1) the operations of the Central Revisory Board, (2) the ticket-of-leave scheme under which they may be conditionally released for employment under the Public Works Department and earn good wages, (3) the conditions to be fulfilled by volunteers desiring to go to Port Blair as self-supporters and (4) the special remission being awarded for freedom from punishment for a year or longer, the criterion for all of which is good conduct.

9. *Corporal Punishment.*—As will be seen from Table D appended to this report, there were 70 (83) whippings during the year. The offences for which this punishment was inflicted were assaults 41, contumaciously refusing to work 17, creating a serious disturbance with the intention of breaking out of jail 5, attempt to escape 3, conspiring to do mischief by fire 2, inciting prisoners not to take their food but to go on hunger strike 1, and making a serious charge against a paid warder, which charge on investigation proved to be absolutely false and malicious, 1. A review of the corporal punishment reports, submitted to my office in these cases, is convincing that the flogging inflicted was well merited and it is gratifying to be able to place on record that the cane was not resorted to unnecessarily.

It may here be noted that the number of whippings inflicted falls considerably short of what it used to be between twenty and thirty years ago. While the maximum number flogged during the current decade was only 87, *vide* the report for 1923, it was 125 in the year 1910 and 310 in the year 1902. This is some evidence that, as years have gone by, there has been much improvement in prison discipline and much less tendency on the part of Superintendents to use the cane. In other words, the treatment of convicts is much more humane than it used to be in years gone by, with much better results.

10. The two Camp Jails, *viz.* one at Alôn in the Mônywa District and other at Môkpalin in the Thatôn District, have accommodation for 500 and 2,200, respectively, or a total of 2,700 convicts. At these two jails where stone-breaking is carried on profitably, the work is found particularly distasteful to the convicts, who, while confined in ordinary jails, had a comparatively easy time, suitable forms of hard labour not being

available in the usual run of jails, both central and district. As mentioned in the report for 1928, a riot occurred at the Alon Camp Jail, resulting in thirty-four of the work shirkers being awarded sentences of whipping. On the 27th February 1929, while the Superintendent of the Alôn Camp Jail was investigating prison offences, eight prisoners, whose cases were about to be enquired into, suddenly armed themselves with sticks, hammers, one or two bottles, etc., that were left between the gates and in the office, and assaulted the warder in charge of the gate. He was rendered unconscious by a blow on the head, and the ring-leader seized the keys which were attached to the warder's belt. While this prisoner was endeavouring to open the outer gate, the remaining rioters made a combined attack on the staff. The Superintendent's office was stoutly guarded by two convict maistries, and the Deputy Jailor U On Myint personally held at bay the rioters who attacked his office. The alarm having, in the meanwhile, been sounded by the Superintendent, a number of armed warders and Military policemen arrived on the scene, the remainder of the staff surrounding the jail in the usual manner. Finding that the rioters were trying to open the lock of the main outer gate, the Naik in charge of the Military policemen asked the Superintendent's permission to use firearms. The Superintendent ordered the firing of three rounds of blank ammunition as a warning. As the Military Police had none of this ammunition, the firing was carried out by a jail warder. Assistant Jailor Mr. Bodeker, who had slipped out of his office window and climbed over the barbed wire fence, called upon the rioters to surrender, warning them that they would be fired on if they refused to do so. The prisoners took no notice of this warning and, having failed to open the lock with the proper key, they tried to break it open with a hammer. As the rioters did not surrender even after blank shots had been fired, the Superintendent ordered the guard to make use of ball cartridges. Two shots were fired, the first of which missed the culprits. I am inclined to think this was done intentionally in order to frighten the rioters into submission, rather than hurt them. The second shot, which was aimed at the ringleader, killed him on the spot. Seeing their leader fall, the remaining rioters rushed into the Assistant Jailor's office, presumably with the object of taking cover. The gate keys, at this stage, were in the hands of the dead prisoner. They were retrieved by the two convict maistries and handed over to the Superintendent, who passed them out, through a window, to the warder staff outside. The outer gate was then opened through the palisading and the staff was thus able to come to the assistance of those who were penned in in the office. The rioters did not surrender immediately, but continued to attack the staff, and a certain amount of force was necessary before they were overpowered. Injuries were inflicted on both sides ; altogether nine warders and the Deputy Jailor received wounds which were, however, not of a serious nature. In

addition to the deceased ringleader of the riot, eight prisoners received injuries, two of them having had their skulls fractured. First aid was rendered locally and the two serious cases removed to the Civil Hospital, Mônywa, for further treatment ; one died and the other recovered. The remaining six were treated in the Camp Jail Hospital. On being sent up for trial the rioters were convicted under sections 353 and 224 of the Indian Penal Code and sentenced to one year's rigorous imprisonment each. For the bravery displayed by the Deputy Jailor U On Myint on the occasion, the Local Government awarded him a revolver and a certificate of honour, both of which are much prized. The Local Government were also pleased, on my recommendation, to remit the unexpired portion of the sentences passed on the two convict maistries for the valuable services rendered by them in defending the Superintendent. For conspicuous courage and meritorious work done by paid warder Abdul Gany in quelling the outbreak, he was granted a monetary reward of Rs. 80. For excellent work in helping the paid warders in the main jail in marching the prisoners to their wards and locking them up, and in the arrest of three of the outbreakers, who were armed with deadly weapons, four convict officers were each awarded three months' special remission, *viz.*, one month by the Superintendent and two months by me.

The Local Government accorded sanction to the temporary entertainment, for another year, of an Assistant Jailor, a head warder and nine warders for guarding dangerous and refractory prisoners drafted to the cell block of the Moulmein Jail. At the beginning of the year there were 82 prisoners of this class there, and 59 were received by transfer, making a total of 141. Of these, the conduct of 39 had so improved that they were re-transferred "reformed," to the jails to which they originally belonged, and 16 were released on expiry of sentence, leaving a balance of 18 including 13, who were employed in the general workyard and kept under observation pending their retransfer to the jails from which they were received. In February 1929 there was an attempt at a violent outbreak by the refractory prisoners confined in the Moulmein Jail cell block, but it was promptly put down. Under the new staff of *ex*-military warders there has been no repetition of the trouble. Seven prisoners of this class were awarded corporal punishment, *viz.*, five for causing disturbances and two for contumaciously refusing to work. But for the attempt at outbreak, the conduct of refractory and dangerous prisoners is reported to have been, on the whole, satisfactory. The results have fully justified the scheme of setting apart the cell block at Moulmein for the reception of refractory and dangerous convicts. The "reformed" ones, who have been retransferred to the jails from which they came, may be relied upon to curb their tempers and do everything in their power to guard against being sent to Moulmein a second time as a penal measure.

The effect of the strict discipline at Moulmein, which is now generally known all over the province, has been very salutary.

The Local Government sanctioned the continuance, for another year, of the special patrol party of eight for the Insein Central Jail which is reserved for the accommodation of habituals. The party consists of two retired Indian Army officers and six pensioned sepoys. As in the previous year, the Superintendent of the Insein Central Jail has reported favourably on the work of the patrol whose unexpected appearance in different sections of the jail keeps the prisoners on the alert and out of mischief. Compared with the year 1928, there has been a decrease under all heads of offences, this being most marked under assaults 68 (113) and other offences 1,483 (1,636). There is no doubt that this satisfactory feature in the administration of the Insein Central Jail is due to the employment of the patrol party.

All Superintendents are of opinion that the type of warder attached to their jails is of poor quality and not to be depended on in an emergency. I am in entire agreement with this view, and steps are contemplated for the recruitment of a better class of warder. There is now before the Local Government a set of draft rules in regard to the conditions under which recruits, from the Punjab, may be obtained for service as warders in our jails.

11. *Conduct of Habituals.*— Prisoners of the habitual class numbered 6,524 (7,819) or 35·25 (40·84) per cent. of the daily average convict population. They accounted for 32 of the 54 offences dealt with by criminal courts and for 8,174 out of a total of 15,493 punishments inflicted by Jail Superintendents. Of the 70 awards of whipping they received only 26. One explanation of this phenomenon is that habituals are generally well acquainted with the rules relating to prison discipline and they studiously avoid the commission of offences that would render them liable to flogging.

12. *Undertrial Prisoners.*—At the opening of the year there were 1,321 (1,583) of these prisoners under detention and 19,979 (19,793) were received during the year, making a total of 21,300 (21,376); of these 10,390 (9,831) were released, 9,006 (9,695) were convicted and sentenced, 577 (512) were transferred, 1 (1) escaped, and 9 (16) died, so that the number remaining at the close of the year was 1,317 or 4 less than in the year 1928. The daily average number was 1,334 or 51 below the previous year's figure. The period of detention works out to 25·09 days compared with 26·11 days in 1928 and 28·57 days in 1927. I repeat the suggestion made in the previous two annual reports, *viz.*, that, considering the large sums of money spent on the maintenance of undertrial prisoners, more use might be made, by courts, of the powers of enlarging such prisoners on bail, especially as a large percentage of them are discharged or acquitted after being tried.

Statement XVII.

CHAPTER II.

FINANCIAL.

13. *Statement IX.*—The total expenditure incurred in guarding and maintaining prisoners during the year under report was Rs. 24,95,456 (23,77,384), an increase of Rs. 1,18,072. Variations in expenditure under the following heads account for the nett increase of Rs. 1,18,072 :—

	Increase.	*Decrease.*
	Rs.	Rs.
Establishment Charges	1,45,226	...
Dietary Charges	...	91,235
Hospital Charges	3,269	...
Clothing and Bedding	9,220	...
Sanitation Charges	10,030	...
Charges for moving prisoners	25,732	...
Miscellaneous Services and Supplies	15,642	...
Travelling Allowances	...	6,656
Contingencies	...	1,501
Charges for Live Stock, Tools and Plant	8,345	...
Total ...	2,17,464	99,392
Nett increase ...	1,18,072	

Explanations of the variations are furnished below.—

Establishment Charges—amounted to Rs. 10,62,295 (9,17,069), an increase of Rs. 1,45,226, which is distributed as follows :—

	Rs.
Central Jails	67,829
District Jails	21,352
Camp Jails	52,727
Subsidiary Jails	3,318
	1,45,226

This increase was caused by—

(*a*) The inclusion under Establishment Charges of the pay of the technical staff attached to the Boot Factory and Weaving Department of the Insein Jail. This expenditure appears to have been omitted in previous reports.

(*b*) The entertainment of a larger number of temporary warders to guard prisoners employed on extramural works.

(*c*) The opening of the second Camp Jail at Môkpalin and the entertainment of staff there.

(*d*) The entertainment of staff for the new Subsidiary Jail at Pakôkku.

(*e*) The Subsidiary Jail at Kyaikto was under the charge of the Department for the whole year, as against only six months last year.

(*f*) The entertainment of Assistant Surgeons at the Insein Central Jail and the Môkpalin Camp Jail.

(*g*) Leave pay of Deputy Superintendent Mr. G. H. Secluna.

(*h*) Entertainment of the Patrol staff at the Insein Central Jail for the whole year, as against nine months last year.

(*i*) Entertainment of staff in charge of the "Bad Hat" Section of the Moulmein Jail for the whole year, as against four months last year.

(*j*) Normal increments earned by the staff. The entertainment of additional staff for the Quarry Camp Jail at Môkpalin and for the Subsidiary Jail at Pakôkkú could not be avoided, as these institutions came under the control of the Department at a time when the population in regular jails was greatly in excess of the figure on which the permanent staff is based, and the additional staff that was entertained merely fills a need that has been pressing for some years.

The entertainment of an Assistant Surgeon at the Insein Central Jail fills a long felt want, whilst at the Môkpalin Camp Jail an Assistant Surgeon was essential to look after the health of 2,200 convicts, particularly as there is not a Civil Surgeon in the station.

Dietary Charges.—The total expenditure amounted to Rs. 8,65,817 (Rs. 9,57,052), a decrease of Rs. 91,235. The average cost per head fell from Rs. 46-9-9 to Rs. 43-10-0. The saving was due to the favourable rates at which supplies of paddy were obtained. For pulses, slightly higher rates were paid, *vide* details in the subjoined table:—

Article.	Rate.		Quantity.		Cost.	
	1928.	1929.	1928.	1929.	1928.	1929.
(1)	(2)	(3)	(4)	(5)	(6)	(7)
	Rs. A. P.	Rs. A. P.	Baskets.	Baskets.	Rs.	Rs.
Paddy ...	191 6 0	174 9 4	325,640	310,700	6,23,193	5,42,430
Pegya ...	208 0 0	280 15 8	20,700	20,000	43,056	56,196
Gram ...	234 0 0	330 0 0	9,500	11,000	22,230	36,300
Wheat ...	378 0 0	438 13 10	6,000	4,700	22,680	20,627
					7,11,159	6,55,553
						— 55,606

The average cost per head at the different classes of jails was as follows:—

		Rs. A. P.
Central Jails	... ...	42 14 0
District Jails	... ...	41 2 0
Camp Jails	... ...	53 13 0
Subsidiary Jails	... ...	79 3 0

The dieting of prisoners at Camp Jails costs more on account of the incidental expenses in despatching dietary articles and also on account of the extra diet allowed for the convicts employed on particularly hard labour. The high cost at Subsidiary Jails is due to the undertrial prisoners being fed on the contract system.

Hospital Charges.—Rs. 70,028 (Rs. 66,759), an increase of Rs. 3,269 that calls for no comment.

Clothing and Bedding.—Expenditure increased by Rs. 9,220, *i.e.*, from Rs. 1,13,643 to Rs. 1,22,863. The increase is due to the larger number of convicts employed at the Quarry Camp Jails where the nature of the work is particularly hard and the clothing does not last as well as in other jails.

Sanitation Charges.—Rs. 27,997 (Rs. 17,967). The increase of Rs 10,030 is accounted for by the additional cost of the water supply at the Insein and Mokpalin Jails. At Insein an axiflow deep well pump was installed to work the new tube well. This electrically driven pump is expensive to run in that it takes twice as long to fill the storage tanks, and the matter is under investigation. For the Môkpalin Camp Jail two electrical pumps were ordered; but, owing to an unreasonable delay in delivery, some seven months elapsed before they were installed. In the interim, the Public Works Department fixed up an old steam pump which gave endless trouble and cost more in repairs than the value of a new pump. The electrical pumps have since arrived and a saving in future on the cost of water supply at Mokpalin is anticipated as the water pumping will be done by night during the working hours of the engine and dynamo for lighting the camps.

Charges for moving Prisoners.—Rs. 1,10,779 (Rs. 85,047), an increase of Rs. 25,732. The bulk of this increase occurs under transportation charges at Rangoon due to the increase in the number of prisoners sent to the Andaman Islands. Another contributory cause is an increase of over 2,000 in the number of prisoners released under the orders of Government.

Charges for Miscellaneous Services and Supplies.—Rs. 1,22,356 (Rs. 1,06,714), an increase of Rs. 15,642. Lighting charges at Mokpalin Camp Jail increased by Rs. 9,000 whilst Rs. 4,700 was spent on the equipment of the additional staff entertained for the second Camp Jail at Mokpalin.

Travelling Allowances.—Rs. 25,804 (Rs. 32,460). The decrease of Rs 6,656 was due to fewer transfers amongst the staff.

Contingencies.—Rs. 52,925 (Rs. 54,426). The small decrease of Rs. 1,501 calls for no remarks.

Extraordinary Charges for Live Stock, Tools and Plant.—Rs. 34,592 (Rs. 26,247). The increase of Rs. 8,345 is mainly accounted for by the purchase of two motor lorries for use at the Rangoon and Myaungmya Central Jails.

Renewal of arms at the Bassein Central Jail and the purchase of new arms for the Mokpalin second Camp Jail and the Pakôkku Subsidiary Jail cost nearly Rs. 3,000.

As will be seen from the foregoing the increased cost of establishment, Rs. 1,45,226, actually exceeded the nett increase in the total expenditure for the year—Rs 1,18,072, and this item combined with a drop of 688 in the total population dealt with, is mainly responsible for the cost of maintenance per head advancing from Rs. 115-3-0 to Rs. 125-1-0. Whilst the number of prisoners in our jails last year was less than the previous year, the population is still too high to enable me to anticipate any reduction in establishment. With the increased accommodation available at Camp Jails it may be possible to convert some of the smaller District Jails into Subsidiary Jails for the confinement of undertrial prisoners, with a reduced staff. A start has already been made in this direction by reducing the Sandoway Jail to a Subsidiary Jail and the Kyaukpyu Jail will be similarly reduced when the anti-malarial work for the Public Health Department, which is being carried out by convict labour, is finished. I am at present examining a scheme for converting seven more District Jails into Subsidiary Jails, and if this is considered possible proposals will be submitted to Government.

14. *Jail Dairies.*—The profit derived from Jail Dairies shows an increase from Rs. 1,503 in 1928 to Rs. 2,905 in the year under review.

15. *Jail Gardens.*—Prison requirements valued at Rs. 1,21,511 (Rs. 1,20,746) were met and the surplus produce sold to the public realized Rs. 10,369 (Rs. 11,424). The Bassein Central Jail returns the largest cash receipt, *viz.* Rs. 1,445, the Myingyan Central Jail being next with Rs. 1,146. The Rangoon Central Jail, the Môkpalin Camp Jail and the Pakôkku Subsidiary Jail purchased vegetables to the value of Rs. 10,726. Efforts are being made to improve the garden at Mokpalin which, up to date, has suffered severely from the ravages of ants.

The estimated value of paddy, dhal, condiments, etc., raised by prison labour was Rs. 48,993 (Rs. 57,170). The crops of paddy at Myaungmya, Thayetmyo and Maubin failed on account of floods and damage by insects. I am glad to be able to record that the crops just harvested show a wonderful improvement, due largely to the application of artificial fertilizers.

16. *Statement XI.—Employment of Convicts.*—There was a slight fall in the number of convicts under sentence of labour on working days, the figure being 16,414 as against 16,962 last year. After deducting the sick, convalescent and those not employed for other reasons, the number available for employment was 14,749 (15,318). The number employed on intramural industries decreased from 5,278 last year to 4,503, whilst

the number employed under the Public Works Department increased from 424 to 1,089 due to the additional accommodation provided at the Mokpalin Quarries Camp Jail. During the year the construction of the extension to the Mokpalin Quarries Camp Jail to accommodate an additional 1,100 convicts was commenced and it has since been completed. The available accommodation at Camp Jail is now as follows:—

Mokpalin Quarries	2,200
Alon Quarry	500
	2,700

It is hoped that these quarries will provide permanent employment for the full number for whom accommodation exists. In the year under review the daily average number of convicts at the Camp Jails was Mokpalin 1,379 and Alon 420, or a total of 1,799, and as the result of their labour a sum of Rs. 1,13,896 was paid into the Treasury. The value of these Camp Jails both as a means of accommodating the surplus population and of providing hard and remunerative labour cannot be overestimated.

17. *Statement XII.—Result of the Employment of Convicts.*—With the abolition of the old Statement XII, the cash earnings and the results of the working of the manufacture department are now embodied in what was previously termed the Supplement to Statement XII.

The past year constitutes a record both as regards gross and nett cash receipts, the comparative figures for the past five years being as follows :—

Year.	Cash paid into treasury on manufacture account including hire of convicts.	Cash drawn from treasury on manufacture account.	Nett Cash receipts.
	Rs.	Rs.	Rs.
1925	4,29,003	2,19,723	2,09,280
1926	4,28,446	2,00,402	2,28,044
1927	4,79,396	86,940	3,92,456
1928	4,71,739	2,21,972	2,49,767
1929	7,08,466	3,06,212	4,02,254

Calculated as per column 6A of Statement XII, which takes into account variations in stock of manufactured articles, raw materials and outstanding bills, etc., the profit on the working of the manufacture department for the year was Rs. 4,53,723, equivalent to Rs. 27-10-0 per head of the number sentenced to labour. Comparative figures for the past five years are given below :—

Year.	Profit as per column 6A of Statement XII.	Profit per head of average number sentenced to labour.
	Rs.	Rs. A. P.
1925 ...	3,20,392	21 1 2
1926 ...	2,82,331	17 11 10
1927 ...	3,71,644	23 5 1
1928 ...	3,43,628	20 4 2
1929 ...	4,53,723	27 10 0

That such satisfactory results should have been achieved, in spite of the continued trade depression, reflects great credit on the Supervisor of Industries. The extensive programme of extramural works undertaken at several jails, combined with the Quarry Camp Jails, contributed largely towards the record gross receipts of Rs. 7,08,466. The profitable nature of these works will be better realized if it is considered that from an expenditure of Rs. 11,501 the Alon and Mokpalin Camp Jails obtained receipts amounting to Rs. 1,13,896 or a clear profit of over a lakh of rupees. The Insein Jail has done well by increasing its cash receipts from Rs. 35,647 to Rs. 75,415 and the profit from Rs. 33,616 to Rs. 42,471. The activities of the tailoring department combined with more work undertaken for the Police Department are responsible for the improved results. Figures of the Boot Factory are shown separately. The receipts amounted to Rs. 77,986, but as the expenditure was Rs. 77,428 it was not of material assistance to the manufacture department. Information has just been received that the Jail Department's tender for the supply of blankets, putties, cotton dhurries and several other articles to the Police Department for the year commencing 1st April 1930 has been accepted. This is a great stride in the progress of the weaving department of the Insein Jail and I rely on the Textile Expert U Khin Maung to carry out these contracts to the satisfaction of the Police Department. Improved results, which are more or less general, are most noticeable at Prome, Maubin, Henzada, Toungoo, Yamèthin, Mergui, Bhamo, Katha and Shwebo District Jails, at all of which extramural work was undertaken on a large scale. The

figures of the Prome, Maubin, Yamèthin and Mergui Jails are recorded as follows :—

Jail.	Cash Receipts.		Profit.	
	1928.	1929.	1928.	1929.
(1)	(2)	(3)	(4)	(5)
	Rs.	Rs.	Rs.	Rs.
Prome ...	5,626	15,042	3,721	14,117
Maubin ...	9,955	19,646	5,439	16,323
Yamèthin ...	524	6,447	461	5,472
Mergui ...	6,017	10,764	6,726	7,186
Total ...	22,122	51,899	16,347	43,098

The average profit per head of the number sentenced to labour for all jails is Rs. 27-10-0 (20-4-0). Jails returning figures above the average are in order of merit—

	Rs. A. P.	Rs. A. P.
Alon Camp Jail ...	126 8 0	(117 2 7)
Mergui ...	101 3 0	(98 14 6)
Maubin ...	81 3 0	(28 5 3)
Shwegyin ...	68 0 0	(87 0 9)
Mokpalin Camp Jail ...	63 11 0	(43 6 8)
Bhamo ...	59 12 0	(33 3 4)
Katha ...	46 11 0	(17 6 0)
Prome ...	44 15 0	(10 7 3)
Yamèthin ...	43 7 0	(3 6 2)
Akyab ...	41 9 0	(11 13 9)
Sandoway ...	40 8 0	(35 3 0)
Mogôk ...	37 11 0	(38 8 5)
Rangoon ...	36 7 0	(33 12 10)
Henzada ...	30 15 0	(30 8 4)
Insein ...	27 13 0	(15 0 8)

The Quinine Section of the manufacture department of the Rangoon Jail resulted in a profit of Rs. 5,173, receipts being Rs. 19,172 (23,258) and expenditure Rs. 13,999 (Rs. 18,508). The reduction of over Rs. 4,000 in receipts is noticeable.

Statement XIII.

18. *Average Nett Cost Per Head.*—Notwithstanding the favourable results of the manufacture department, the increased expenditure on maintenance, combined with the reduced population, have caused the average nett cost per head to rise slightly from Rs. 103-1-0 in 1928 to Rs. 104-14-0 in the year under review. As the increased expenditure on maintenance was mainly incurred in meeting the pressing needs of the Department in the matter of additional staff to guard the greatly swollen numbers in our jails, no blame for the higher cost of maintenance can be attached to

the manufacture department. In fact had it not been for the excellent results achieved a considerably higher cost per head would have had to be recorded.

19. *Cost to the State Per Head of Numbers employed on Manufactures.*—As a matter of interest I append figures showing the sum and the figure per head that Government actually loses on the labour employed on manufactures. Figures for the period 1925-29 are furnished for the sake of comparison.

The calculation is based on the numbers employed on manufactures, *vide* columns 8K and L, and 9 of Statement XI multiplied by the cost per head of average strength—maintenance charges—Column 14 of Statement IX. From this figure is deducted the profit—Column6A of Statement XII, and the difference shows the loss or profit that Government makes on the labour employed on manufactures. The figures for 1925-29 are as follows :—

Year. (1)	Number of prisoners employed on Jail manufactures column 8 K & L & 9 of Statement XI. (2)	Cost per head of average maintenance column 14. Statement IX. (3)	Total cost of maintenance of labour employed on manufactures. (4)	Profit column 6A of Statement XII. (5)	Difference representing the loss to Government on labour employed on manufactures. (6)	Loss per head of number employed. (7)	Amount per head recovered from labour employed on manufactures. (8)
		Rs. A. P.	Rs.	Rs.	Rs.	Rs.	Rs.
1925 ...	5,403	116 8 0	6,29,449	2,94,987	3,34,462	62	55
1926 ...	5,765	114 6 0	6,59,371	2,80,246	3,79,126	66	49
1927 ...	5,596	118 3 0	6,61,377	3,71,587	2,89,790	52	66
1928 ...	5,893	115 3 0	6,78,800	3,43,005	3,35,795	57	58
1929 ...	5,747	125 1 0	7,18,734	4,53,723	2,65,011	46	79

The above figures show that we are unable to recover even the cost of maintaining the labour employed on manufactures. My contention is that the return from labour employed on manufactures should at least equalize the cost of their maintenance, and whilst we have still a long way to go to achieve this desired result, the figures given above clearly show the improvement that has been effected since the appointment of an officer to take charge of the Industries Section. This officer was appointed in 1926 when the loss per head was Rs. 66 per annum. During the year under review the loss per head was reduced to Rs. 46 or saving of Rs. 20 per head of the number employed. In the year 1929, the percentage of recovery of the expenditure on the manufacture department, *i.e.*, the cost of the labour minus the profits derived from their labour, was 63 per cent. I recently had the opportunity of examining the figures of the Dutch East Indies Prison Department for

the year 1928, and it is interesting to note that in their case the percentage of recovery of the expenditure on the manufacture department was 79 per cent. We are thus not alone in our inability to recover the cost of maintaining our labour force, and it would be of interest to compare the figures of Burma with those of other Provinces in India.

CHAPTER III.

VITAL.

20. *Diet* was issued in accordance with the prescribed scale. That the diet is wholesome and nourishing is proved by the fortnightly weighment results which show that, of the 33,050 prisoners released during the year, 63·83 per cent gained weight and only 16·88 per cent lost weight, the corresponding figures for the previous year being 65·55 and 13·86 per cent.

21. *Water Supply.*—The tube well sunk at Shwebo has not proved a success. The water is not of good quality and the output is insufficient. The water is therefore being used for irrigation and bathing purposes. The supply of drinking water is obtained from the Shwebo Canal ; it is conveyed to the jail in two casks, filtered, and chlorinated before issue. At Moulmein the water supply comes from a tube well in the jail compound ; the quantity is sufficient and the water has been pronounced to be fit for use. On completion of the Bassein Town Water Supply Scheme, the question of connecting the Bassein Central Jail with that source of supply will be taken up. Meanwhile, the jail obtains its requirements of water from eight wells situated inside the jail. Though great care is taken in every jail to ensure a pure water supply for drinking purposes, orders were issued, during the latter half of the year, for chlorinating it owing to the large incidence of dysentery and similar bowel complaints. The chlorination is carried out by means of tropical chloride of lime which method is found to be both economical and efficient.

At the instance of the Director of Public Health, Burma, experiments were carried out, at three jails, with an anti-dysenteric vaccine prepared in the Harcourt Butler Institute at Rangoon. At two of the Jails, however, the observations made were incomplete, this being due to the Medical Officers concerned not having closely followed the instructions given them in the matter of recording the results. Out of 600 cases inoculated in the Myaungmya Central Jail, 16 cases of primary dysentery developed as compared with 34 cases among the non-inoculated. There is no definite laboratory diagnosis of the type of dysentery in these cases but, even in the absence of this, the figures are significant, showing that the full inoculation, with three doses, has

reduced the incidence of dysentery among the inoculated by one-half as compared with the controls, all cases of relapses in both groups being ruled out. As regards deaths, five occurred among the inoculated and seven among the controls. The difference is not sufficiently marked to justify a definite expression of opinion as to the value of the inoculation in reducing the death rate. Through the kind courtesy of the Public Health Department arrangements have been made to experiment with the vaccine in eight Central Jails and six District Jails where the incidence of dysentery has been high during the year. The results will be watched with interest.

22. *Employment.*—As usual, care is taken by Medical Officers in determining the appropriate form of labour on which a prisoner is placed on his admission to jail. As a whole, prisoners do not suffer from the nature or the amount of work allotted to them. At my periodical inspection of jails, all prisoners are paraded before me with their history tickets, and it was very seldom, indeed, that there was occasion to draw the Medical Officer's attention to the case of a prisoner who appeared to require a change of labour. Prisoners found to be losing weight are given light work and special diet till they regain their normal weight.

23. *Clothing.*—The prescribed clothing, *viz.*, two suits each, a towel, a bathing slip, a blanket, and a gunny covering, is provided for all prisoners. This is found sufficient for all purposes. The clothing is washed with soap once a week. During cold and inclement months, weakly, old and infirm prisoners are supplied with blanket *kurtas* (coats). The central jails and the large district jails are provided with Thresh's disinfectors in which the clothing and bedding are regularly sterilised ; in the smaller district jails and subsidiary jails a " Serbian " barrel is effectively used for this purpose.

24. *Conservancy.*—This important matter receives, from Medical Officers, the care and attention it calls for. The general method is the dry earth system, which is usually found to work well in practice. Soakage pits, for the reception of urine, are in general use except in a few jails where they are reported to be unsuitable for one reason or other. The advantage of these pits is that they are free from smell and do not attract flies.

25. *Vaccination.*—Of 35,135 (36,846) prisoners vaccinated, 1,592 (2,263) were primary and 33,543 (34,583) were revaccinations. The percentage of successful cases was 84·23 (69·33) of the former and 50·76 (55·09) of the latter. There was 1 (21) admission for small-pox and there were 6 (18) admissions for chicken-pox. All the cases recovered.

As in previous years, the lymph used for vaccination was obtained from the Vaccine Depôt at Meiktila and found to be of good quality.

26. *Condition of Prisoners discharged.*—Of the 33,050 prisoners released during the year, 63·83 (65·55) per cent gained weight, 16·88 (13·86) per cent lost weight and 19·29 (20·59) neither gained nor lost weight compared with what it was on the prisoners' admission to jail. These results are eminently satisfactory and establish the fact that, thanks to the care and attention bestowed upon them, a large majority of the prisoners leave jail in a far better condition than they were at the time they were convicted and sent to prison.

Statement B.

27. *Sickness and Mortality among all classes of Prisoners.*—It is with regret that I record that the health statistics are even less favourable than those of the previous year. The number of admissions to hospital fell from 11,977 to 11,283, but there was a rise in the daily average number of sick 384 (368) and the number of deaths 546 (514). Of the deaths 535 (497) were among convicts, 9 (16) among undertrials, and 2 (1) among civil prisoners. There were three deaths from cholera and two from plague. Accidental deaths numbered four, against eight in the previous year. Of fifty-four prisoners released on medical grounds, eight cases were returned as deaths, the prisoners having been in a moribund state at the time of being liberated and made over to their relatives who had expressed their willingness to look after the prisoners. The death rate per mille in the several classes of jail was as follows :—

Statement XIV.

Central Jails	... 391 deaths	32·13 (29·57).
District Jails	... 139 deaths	23·81 (16·53).
Camp Jails	... 14 deaths	7·78 (2·82).
Subsidiary Jails	... 2 deaths	13·25 (10·99).

Of the 391 deaths in Central Jails, Insein returned 85, Myaungmya 80, Rangoon 50, Thayetmyo 48, Tharrawaddy 46, Mandalay 41, Bassein 24 and Myingyan 17.

Insein.—The deaths were due to tuberculosis 27 (including 10 cases sent to the special Tubercular Ward at Myingyan), dysentery 16, pneumonia 8, nephritis 7, colitis and cirrhosis of liver 4 each, cholera, diarrhoea and peritonitis 2 each. The rest of the deaths, 12 in number, were due to various other diseases. To the credit of Major J. C. Bharucha, I.M.S., who assumed charge of the Insein Central Jail on the 6th August 1929, it may be mentioned that during the months of September to December there were only five deaths, compared with forty-three for the corresponding period of 1928.

Myaungmya.—Dysentery accounted for 28 deaths, pulmonary tuberculosis 13, anaemia and debility 11, enteric fever and cirrhosis of liver 4 each, and tuberculosis of intestines 2. The other 17 deaths were due to isolated diseases.

Rangoon.—Dysentery gave rise to 15 deaths, tuberculosis 6 (including three at Myingyan), pneumonia 5, typhoid 4, syphilis and nephritis 2 each ; the remaining 16 deaths were caused by individual diseases.

Thayetmyo.—The deaths were due to dysentery 15, tuberculosis 12 (including 6 at Myingyan), colitis 4, nephritis and debility 3 each, ankylostomiasis and pneumonia 2 each. The other 7 deaths were due to various diseases. It is satisfactory to note that the mortality ratio for this jail dropped from 87·23 per mille in 1928 to 53·27 per mille in the year under review.

Tharrawaddy.—Dysentery registered 15 deaths, tuberculosis 9 (including 4 at Myingyan), malaria 5, debility 4, pneumonia and cirrhosis of liver 2 each; the other 9 deaths were due to various diseases.

At the remaining three Central Jails there is only a little difference between the death rates for 1929 and the preceding year, *vide* details given below.—

Mandalay	31·96	(33·07)
Bassein	18·11	(16·90)
Myingyan	12·44	(15·72)

It will be seen that, for the year under report, Myingyan heads the list of Central Jails in the matter of the lowest mortality ratio.

District Jails.—At three of these jails, *viz.*, Thatôn, Mergui and Shwegyin, there was no death. Compared with the previous year, 7 jails returned a lower death rate; these are Maubin 7·33 (15·04), Moulmein 8·41 (11·07), Tavoy 12·74 (21·62), Yamethin 16·22 (26·60), Akyab 18·31 (18·40), Katha 20·00 (29·13) and Mogôk 35·09 (40·82).

Of the remaining 12 District Jails, the lowest mortality was returned by Shwebo 7·94 (*nil*) per mille, and the highest by Mônywa 93·90 (23·26) per mille; at the latter jail there were a total of 20 deaths which, however, included 12 among prisoners received from the Alon Camp Jail for medical treatment.

Camp Jails.—Combined together the two Camp Jails at Mokpalin and Alon returned a death rate of 7·78. The comparative lowness of the ratio can readily be accounted for: only able-bodied prisoners in robust health are selected for transfer to those jails and when, owing to illness they become unfit for hard labour, or require special medical treatment, they are disposed of by transfer, the hospital accommodation at the two Camp Jails being limited.

Subsidiary Jails.—There was no death at Taungdwingyi. With one at Kyaikto and another at Pakôkku, the three subsidiary jails returned a mortality ratio of 13·25 per mille.

The health and other statistics, relating to the 546 prisoners who died, were as follows :—

256 (215) were admitted to jail in good health, 99 (77) in bad health, and 191 (222) in indifferent health.

7 (12) died within a week of admission.

8 (5) within two weeks.

5 (16) within three weeks.

3 (4) within four weeks, and 523 (477) after more than a month's detention.

30 (22) deaths occurred among prisoners who, on admission to jail, were in such a bad state of health that they had to be sent direct to hospital. Of 66 prisoners removed to Civil Hospitals for surgical or other treatment, 46 were discharged cured and returned to jail to serve out their sentences, towards which the period spent in hospital was, as usual, allowed to count. The other twenty prisoners died while under treatment.

Health of Prisoners repatriated from the Andamans.—Eight long-term prisoners against 14 in 1928, were retransferred from Port Blair to the Rangoon Central Jail on medical grounds. Of these 8, two were released during the year. The remaining six were sent to the Central Jails to which they belonged prior to their deportation to Port Blair years ago.

28. *Statement XV.—Admissions and Deaths among Convicts from the principal diseases.*—The following table shows, for the past five years, the admissions to hospital and deaths among convicts for the principal diseases :—

Ratio per mille of average strength.

Diseases.	1925		1926		1927		1928		1929	
	A	D	A	D	A	D	A	D	A	D
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
Cholera ...	...	...	0·56	0·33	0·45	0·39	0·16	0·10	0·16	0·16
Dysentery ...	21·01	0·56	39·39	2·34	32·67	3·68	45·80	5·75	59·75	7·83
Malaria ...	40·03	0·37	34·55	0·50	35·35	0·50	37·76	0·68	49·43	0·59
Pneumonia	5·51	1·05	5·01	1·00	4·85	1·56	7·57	2·30	5·51	2·11
Diarrhoea ...	2·97	0·12	5·06	0·45	3·62	0·28	7·83	0·37	11·02	0·54

The admission and death rates for cholera are the lowest except for the year 1925 when there were no cases of this disease and the year 1928 when the death ratio was only 0·10 per mille. The admission and death rates for dysentery and diarrhoea are the highest for the five-year period; the same remark applies to malaria and pneumonia except that in the case of the former disease the mortality was 0·9 per mille lower than in the previous year, and for pneumonia the admission and death rates per mille were 2·06 and 0·19, respectively, less than in the year 1928.

Cholera.—There were 3 admissions, *viz.*, Insein Central Jail 2 and Kyaikto Subsidiary Jail 1, all 3 proving fatal. The first case at Insein was an imported one, the prisoner having been received from the Pyapôn Lock-up in a collapsed state. The second prisoner must have got the infection from the first case. The one at Kyaikto was also imported; the prisoner came from Kaywe (where cholera was epidemic at the time) to stand his trial before the Township Magistrate, Kyaikto. The precautions taken prevented a spread of the disease and no other cases occurred.

Dysentery.—The 1,106 (877) admissions with 145 (110) deaths are accounted for as follows :—

Jails.		Number.		Ratio per mille.	
		A	D	A	D
Central Jails	...	664	113	57·67	9·81
District Jails	...	301	31	58·23	6·00
Camp Jails	...	141	1	78·38	0·56
Subsidiary Jails	...	...	...	...	...
Total	...	1106	145	59·75	7·83

Of the Central Jails, Myaungmya returned the highest number of admissions and deaths, *viz.*, 177 (68) and 28 (1), respectively, followed by Insein 99 (190) with 16 (43) deaths, Rangoon 123 (235) with 15 (11) deaths, Tharrawaddy 51 (29) with 15 (1) deaths, Thayetmyo 39 (30) with 15 (20) deaths, Mandalay 91 (84) with 13 (8) deaths, Bassein 45 (18) with 7 (6) deaths and Myingyan 39 (31) with 4 (3) deaths.

Among the District Jails, Mônywa heads the list with 104 (11) admissions and 10 (1) deaths. The number of deaths returned by the other District Jails are Bhamo 6 (*nil*), Meiktila 4 (3), Paungde 3 (*nil*), Toungoo 3 (2), Kyaukpyu 2 (*nil*), Akyab 1 (3), Magwe 1 (1), and Katha 1 (*nil*). At the remaining 13 District Jails, the Alon Camp Jail, and the 3 subsidiary jails there was no death from dysentery. The Môkpalin Camp Jail returned 1 death under this head.

Of the 145 deaths, 45 occurred during the first half of the year and 100 during the second half. There being nothing wrong with the prison diet, the only conclusion to be drawn is that the incidence of dysentery was, perhaps, adversely effected by the monsoons which usually set in about the middle of May and give over in November. The Superintendents of Jails, where a large number of admissions and deaths occurred from dysentery, ascribe the disease to various causes, for example, the prisoners eating raw vegetables picked up in the jail garden, fondness for green chillies which they manage to get somehow or other, drinking of water from unauthorised sources, a number of prisoners being admitted to jail ailing from chronic dysentery, etc.

It may be noted here that, as the result of regular chlorination of drinking water carried out during the latter half of the year, there have been comparatively few admissions and deaths from dysentery and other bowel complaints during the months of January to March 1930. But these being months during which the incidence of dysentery naturally gets reduced, the effect of chlorination will be watched during the ensuing monsoon season. In his Administration Report for the year 1929, the Superintendent of Jail, Myaungmya, writes saying that " from August to December water chlorination was satisfactory and dysentery abated gradually. There was no incidence of dysentery during November and December 1929."

Malaria.—The admission rate rose from 37·76 per mille in 1928, to 49·43 per mille in the year under review, but the death rate fell from 0·68 to 0·59 per mille. The new Central Jail at Tharrawaddy returned the largest number of deaths, *viz.* 5 against *nil* in the previous year. Prophylactic doses of quinine are issued to all prisoners with a history of malaria and, as a rule, no prisoner so treated had a relapse. Patients suffering from malaria are provided with mosquito nets. After discharge from hospital, they are kept in the quinine gang for such length of time as the Medical Officer considers necessary.

Pneumonia.—The number of admissions and deaths being lower than in the previous year, there was a corresponding drop in the ratio of admissions and deaths, *viz.*, 5·51 (7·57) and 2·11 (2·30), respectively. Of the fatal cases, Insein registered 8, Rangoon and

Myaungmya 5 each, Bassein 4, Akyab 3, Tharrawaddy, Thayetmyo and Mandalay 2 each, Meiktila, Bhamo, Shwebo, Katha and the Alon Camp Jail 1 each. At the Insein Jail the deaths occurred among old weak and debilitated prisoners ; all the cases were acute and the sufferers had very little resistive power in them.

Diarrhoea.—The admission and mortality rates per mille rose to 11·02 (7·83) and 0·54 (0·37), respectively. Four of the cases which proved fatal were returned by Central Jails, *viz.*, Insein 2, Thayetmyo and Myingyan 1 each. District Jails registered 2 fatal cases, *viz.*, Toungoo and Shwebo 1 each. The Môkpalin Camp Jail returned 4 deaths for diarrhoea, and the Subsidiary Jails *nil*. It may here be noted that there were no deaths from diarrhoea in the first quarter of the year, five deaths in the second, two in the third and three in the last quarter of the year. As in the case of dysentery, the rains appear to have influenced the mortality from diarrhoea. With the regular chlorination of the drinking water which came into force during the latter half of the year, one has reason to expect that the incidence of diarrhoea will be considerably less in future years.

Tubercular Diseases were responsible for 248 (204) admissions and 134 (120) deaths. The Central Jails returned 168 admissions with 87 deaths, the District Jails 75 with 46 deaths, the Camp Jails 4 with 1 death, and the Subsidiary Jails 1 admission with no death.

In the special tubercular ward at Myingyan there were under treatment, at the opening of the year, 40 patients, accommodation being available for 52 including 2 cells. The number of new admissions during the year was 110. The total number treated was 150 against 110 in the previous year ; 65 were cured, 15 discharged otherwise and 36 died ; the number remaining at the close of the year was thus 34. While remarking in his Sanitary Report on the Myingyan Jail that it is a very hard problem to diagnose early cases of tuberculosis, the Superintendent, Major J. Smith, I.M.S., mentions that most of the patients recovered wonderfully on good diet and rest, combined with the general treatment given to them. *Post mortem* examinations were held on the 34 patients who died ; 29 cases showed lesions in the lungs ; 3 had tuberculosis of the intestines. One had hypertrophy and dilated heart ; 2 died of anaemia. In one case a calculus was found with pus in the right kidney. Among the lung cases a few had enlargement of the mesentric glands. There was a case of tuberculosis infection of the larynx which was secondary to the lung disease. Statistics collected by the Superintendent of Jail, Myingyan, show that of the 150 cases treated during the year, 65 were coolies and 57 were labourers.

Anaemia and Debility accounted for 360 (125) admissions and 27 (9) deaths. The ratio per mille works out to 19·45 and 1·46 compared with 6·06 and 0·4, respectively, in 1928. The Central Jails returned 26 deaths, Myaungmya heading the list with 11 deaths. The Paungde District Jail registered one death. Of the 11 who died at Myaungmya, 3 were opium addicts admitted to jail in indifferent health, one was in bad health and another in indifferent ; of the 6 admitted to jail in good health, 4 were opium consumers, one was far below the average weight for a man of his height and one was in bad health. The eleventh prisoner was treated for ankylostomiasis.

Enteric Fever.—There were a total of 139 admissions with 15 deaths, compared with 58 and 18, respectively, in 1928. Of the fatal cases, four each were returned by the Rangoon and the Myaungmya Central Jails, three by the Mônywa District Jail, one each by Moulmein and Toungoo, and two by the Mokpalin Camp Jails. The origin of the disease was in no case traceable. At the beginning of the year, the Rangoon Jail had something resembling an epidemic of enteric. It is noteworthy that during the epidemic there was overcrowding ; when this was relieved by transfers, the epidemic disappeared. At Myaungmya the Medical Officer ascribes the disease to water from unauthorised sources being drunk on the sly. The Medical Officer of the Mônywa Jail says that the origin of the disease was traced to the Mandalay Jail, but no facts or figures were supplied in support of this theory. At Moulmein, which returned one fatal case, every precaution was taken to prevent a spread of the disease. The urine and excreta of the patient were disinfected and burnt ; the convicts attending the patient were inoculated again with T.A.B. vaccine ; re-inoculation of old convicts after a lapse of one year was systematically carried out ; and the prisoner convalescing from enteric was segregated for three months after discharge from hospital. At Toungoo the whole of the prison population, including the contacts, was given prophylactic doses of T.A.B. injections. The Mokpalin Camp Jail registered three admissions with two deaths ; every effort was made to trace the source of the disease but without success ; the Medical Officer was inclined to the belief that " carriers " existed. There is no doubt that if the Medical Officers of other jails adopted the precautions taken at the Moulmein Jail, an appreciable reduction in the incidence of enteric will result. Circular instructions have been issued to all

Superintendents of Jails drawing attention to the subject and pointing out that arrangements should be made to have all prisoners inoculated, irrespective of the fact of their being short-termers. It is possible that there may be "carriers" among these prisoners and therefore it is necessary to guard against their infecting others.

Beri-Beri.—There were 28 (11) admissions and 1 (*nil*) death. The fatal case occurred at Myingyan. Convicts received on direct transfer from Police lock-ups accounted for 10 admissions and the death. On being questioned, all the patients said that they had contracted the disease while detained in lock-ups. In consequence of an outbreak of beri-beri in the lock-up at Yenangyaung, five under-trials were transferred to the Magwe Jail in December 1929, four of them suffering from this disease. All of them belonged to a gang of six charged with dacoity. As the [illegible] accused was at large, the case was unavoidably delayed and its disposal [illegible]. The result was that the other five co-accused were detained in the lock-up [illegible] three months. The District Health Officer, Magwe, who investigated the outbreak of beri-beri, reported that it was due to bad food (the prisoners were dieted by a contractor) and lack of exercise, adding that insufficient clothing during the cold weather, and lack of arrangements for bathing and for washing clothes, and long detention in the lock-up are contributory causes. Within five weeks of their transfer to the Magwe Jail, three of the undertrials regained their normal health; as regards the fourth man, who was in a bad state, it was reported that he was progressing slowly and it would probably take another month for him to be completely cured. Unpolished rice and a plentiful supply of fresh vegetables are found efficacious in dieting beri-beri patients.

All cases of beri-beri, received on transfer from Police lock-ups, are reported to the Inspector-General of Police and the Director of Public Health, Burma; at the instance of the former official, the Inspector-General of Civil Hospitals is also notified when a death occurs and there is a suspicion that the death was due to a lack of diet, or exercise, at the lock-up, the idea being that disciplinary action may be taken against the Sub-Assistant Surgeon in medical charge of the lock-up.

At Prome, a prisoner convicted under section 380, I.P.C., was sent to the Jail to be whipped. On being examined the man was found to be suffering from beri-beri. The Magistrate who tried the case was informed accordingly, and he altered the sentence to one of three weeks' imprisonment, thus affording the man an opportunity of being suitably treated for the disease.

During the year a leaflet, printed in English and Burmese, prepared by the Public Health Department, was widely distributed by that Department among the villages in Upper and Lower Burma. Copies were obtained and supplied to all Jail Superintendents. The leaflets in Burmese were given to prisoners, on release, for the purpose of propaganda in their villages.

Plague accounted for 3 admissions and 2 deaths compared with 18 and 12, respectively, in the previous year. Of the fatal cases, Bassein returned one and Paungde the other. At Bassein the prisoner infected was employed extramurally. Having reported that he felt unwell, he was examined and found to be suffering from plague. He was promptly removed to the Contagious Diseases Hospital but died after being under treatment for three days. The fatal case at Paungde was a prisoner who was employed in the paddy field. A few months previously he was received on transfer from the Bassein Jail. Plague was prevalent in the Bassein District and in the Prome District of which Paungde is a subdivision. The precautionary measures taken by the Superintendents of the Jails concerned, including inoculation of the prison population, prevented a spread of the disease.

Ankylostoma infection gave rise to 3,440 (4,444) admissions and 7 (6) deaths, the fatal cases being returned by Thayetmyo and Mandalay 2 each, Insein, Moulmein and Toungoo 1 each. All new admissions are regularly examined for ankylostoma and their ova. Those found positive are given a course of either thymol or olium chenopodium.

29. *Opium Consumers.*—The number of opium consumers admitted to Jail during the year was 1,531 (1,998) or 6·70 (8·63) per cent of the convict population. The Jails which returned the highest percentages of opium addicts were Bhamo 87·85, followed by Katha 48·44, Sandoway 32·21 and Myaungmya 23·67.

30. *Mortality among Convicts according to length of time passed in Jail.*—The lowest death rate, *viz.* 20·83 (19·18) per mille, occurred among convicts who spent over six months but not more than one year in jail; next come those who had passed under six months in jail 22·25 (19·37), followed by those who were in jail for more than two years but not exceeding three years 30·69 (28·21), those for more than one year but not more than two years 32·65 (34·48), above seven years 33·47 (17·69), and lastly those in jail for three years but not more than seven years 49·24 (44·83).

Statement XVI.

The chart at the end of this report shows, at a glance, the health statistics for the past five years.

CHAPTER IV.

MISCELLANEOUS.

31. *General Observations.*—Reviewing the sick returns submitted to my office, it is found that, of the 546 deaths, 102 occurred in the first quarter of the year, 127 in the second, 185 in the third and 132 in the last quarter of the year. The mortality ratio for the first half of the year was thus 11·48 per mille and for the remainder of the year 15·48 per mille. Having given the subject my close attention, I have arrived at the conclusion that the following factors, directly or indirectly, contributed towards the high mortality :—

(1) The overcrowding (among convicts) which obtained from January to September 1929, the ill effects of the same manifesting themselves during the latter half of the year.

(2) The large influx of weakly and debilitated prisoners, a number of whom were admitted, in a state of semi-starvation, into overcrowded jails.

(3) The selection of prisoners, volunteering for employment at Port Blair and for ticket-of-leave labour under the Public Works Department, being confined to men in a good state of health.

32. *Accommodation.*—At the close of the year, the total accommodation available for all classes of prisoners, including hospitals and observation cells, was 22,632 against 21,330 in the previous year. The increase is accounted for (1) by the construction, at Mokpalin, of a Camp Jail for 1,100 male convicts, 40 observation cells and a hospital with 16 beds; by the provision, at the Alon Camp Jail, of additional accommodation for 50 male convicts; and by the opening of the Subsidiary Jail at Pakôkku with a capacity for 96 prisoners, *viz.* 83 males and 13 females.

Statement A.

Exclusive of hospitals and observation cells, there was accommodation for 21,176, *viz.* convicts 18,882, undertrials 2,002 and civil prisoners 292, while the daily average numbers of these classes for the year were 18,511,

1,334 and 111 respectively. During the first three quarters of the year there was overcrowding in the convict population, especially in the Central Jails. During the months of October to December 1929 the total daily average number of convicts was well below the accommodation available. A number of jails, however, were not free from overcrowding and arrangements had to be made to obtain relief by transfers to other jails and by a redistribution of the convict population. I am glad to be able to record the fact that the overcrowding, which has been constant since the year 1926, has at last ceased since October 1929. I sincerely trust that we have seen the last of overcrowding in Burma Jails. Overcrowding not only causes great anxiety to the administration but upsets the routine management of a jail, increasing the difficulties of guarding, of enforcing discipline and of obtaining employment. It operates adversely on the incidence of diseases such as tuberculosis and bowel complaints, and adds to the difficulties of medical and sanitary administration.

33. *Progress of Education in respect of juveniles under 18 years of age sentenced to one year and over.*—During the year 278 (394) such prisoners were received in jails. Of these, a daily average of 149 (271) were under secular instruction. Of the 209 prisoners released during the year, 38 on admission to jail were able to read or write, 14 were able to read, and only 157 were illiterate. These results point to the desirability of education being encouraged, as far as possible, among juveniles of the class referred to, and incidentally to a general system of education being extended to all the central jails in the province and the larger district jails as suggested in paragraph 4 (*c*) of this report.

34. *Juvenile Jail at Meiktila.*—This institution, which has accommodation for 121 boys, continued to be run on the same lines as in previous years. The general behaviour of the youths was good, this being borne out by the number of punishments having fallen from 66 in 1928 to 46 in the year under review. I am much indebted to the members of the Visiting Committee for the keen interest they took in the working of the Juvenile Jail.

The question of the treatment of juvenile delinquency had engaged the attention of Government for some considerable time. In November 1925, Mr. Paterson, one of His Majesty's Prison Commissioners, came out to Burma on the invitation of Government and visited the various institutions set apart for juvenile offenders. A Committee under the chairmanship of Mr. Justice Carr was next appointed to examine the recommendations made by Mr. Paterson in regard to the treatment of juvenile delinquents. In 1929, a small Committee, over which I presided, was appointed to examine and report on the suitability of the old abandoned Fort Buildings at Thayetmyo for use for Borstal purposes. That Committee recommended that the Fort should be utilised for

a combined Borstal and Senior Training School for the treatment of juvenile offenders between the ages of 14 and 19. A bill embodying the principles advocated by Mr. Paterson was passed by the Burma Legislative Council during the year and has since received the assent of the Governor-General in Council and acquired the force of law. It is hoped that this much-needed measure of prison reform will soon be accomplished and that the School at Thayetmyo will open before long. Funds have been provided for the opening of the School during this year and an expert Borstal officer is being recruited from England to start the schools.

35. *Imposition of Fetters.*—As a means of punishment, fetters were imposed on only 1,287 prisoners, compared with 2,277 in the previous year. For the purposes of safe custody they were used on 2,415 prisoners against 2,546 in 1928. In all cases when this means of restraint is applied, the prisoners are, as required by rule, provided with fetter guards to prevent abrasion of the skin.

36. *Remission System.*—The number of convicts released under the remission rules was 9,230 (9,608). Only one convict (against five in the previous year) entitled to the benefits of the system failed to earn any remission. As in the previous year, the maximum, *viz.* 1,288 days, was earned by a long-term prisoner confined in the Rangoon Central Jail. For being free from punishment for a year, 6,313 (6,213) were awarded special remission—the number would be much larger but for the transfer to Port Blair of 825 well behaved prisoners who volunteered for employment at Port Blair ; 21,919 (21,438) earned special remission for other reasons ; among these latter are included 192 (133) granted special remission on the recommendation of the Central Revisory Board and 706 (501) who were free from punishment over three years. The rules regarding the grant of remission, a copy of which is hung up in the dormitories, are thoroughly understood by all the prisoners, even the illiterate ones, to whom the rules are read out regularly.

Statement C.

37. *The Burma Prisoners' Aid Society.*—The Society possesses a "Shelter" in Tamwe Road where, by the courtesy of the Salvation Army authorities, a Burman official resides on the premises permanently. He gets into touch with prisoners about to be discharged from the Rangoon Central Jail and, largely through his instrumentality, over a hundred such prisoners were received in the "Shelter" during the year and their wants catered for. Moreover, work was found for more than a third of this number, and in no case has any serious complaint been made with regard to the persons for whom work was provided in this way. While those connected with the management of the Society are

not of opinion that their work, at present, can be carried on upon a large scale throughout the province, they are confident that, in a small way something well worthwhile is being done in Rangoon itself.

38. *Suicides and Accidental Deaths*.—There was one case of suicide, the victim being a prisoner who belonged to a wild tribe of the Somra Tract in the Upper Chindwin District and who, along with his brother, was awarded a sentence of 2 years and 8 months' rigorous imprisonment under sections 323 and 224, respectively, of the Indian Penal Code. Both the men were over fifty years of age and kept aloof from the other prisoners, as very few could understand their language. At each Monday morning inspection parade they orally petitioned the Superintendent of Jail, Mandalay, to release them and it was very hard to convince them that they could not be released. The men appeared to have entertained the idea that the convict nightwatch in charge of them was responsible for their continued detention in jail, and on the 5th October 1929 one of them (the deceased) assaulted the convict nightwatch with a bamboo used for carrying water, thereby causing a contused wound on the head. The brothers were placed in separate cells pending investigation into the assault and while so confined one of them made away with his life, the motive probably being to avoid punishment for the assault, his primitive mind, perhaps, picturing some horrible reprisals of the crime he had committed. The usual inquest was held and the proceedings submitted for the information of the Local Government. No blame for the suicide was attached to any one connected with the jail. The deceased's brother was promptly retransferred to the Mônywa Jail where he would find a more congenial atmosphere and other prisoners who understood his language.

There were six attempts at suicide, three among undertrial prisoners and three among convicts, all of which were happily frustrated. Accidental deaths numbered four; details were reported to the Local Government as they occurred, and it is therefore unnecessary to repeat them here.

39. *Religious Services*.—There were a total of 1,991 (1,766) services held during the year, *viz.* 1,739 for Buddhists, 156 for Christians, 89 for Mohamedans and 7 for Hindus. The prisoners are generally said to have appreciated these services. According to information furnished by Jail Superintendents, the subjects of the sermons for Buddhist prisoners were the "Five precepts and the Eight precepts," which correspond to the "Ten Commandments" to be observed by Christians, lectures on the life of Lord Buddha and other suitable religious topics. The *Maulvis* addressed the Mohamedans on the life of the Prophet Mohamed, while the Hindu priests exhorted prisoners of their sect to behave well in jail and lead good lives on release.

40. *The Salvation Army Juvenile Adult Criminal Institution*.—Of the 35 boys conditionally released for transfer to the above named Institution, which has accommodation for 30, only one had to be returned to the Rangoon Jail, he having left the compound without permission. At the close of the year there were twenty-eight boys in the Institution. The Superintendent in charge reports that he had plenty of work to keep the inmates busy, and the furniture turned out is sold readily. The garden in the compound yields a good supply of fresh vegetables for the boys, all of whom do a good day's work commencing at 6-30 a.m. and finishing at 4-15 p.m., one hour being allowed for the mid-day meal. The conduct of the boys has been "very good." Many of the visitors to the Institution are surprised at how well discipline is maintained without guards or warders. In the evenings, the boys are persuaded to take part in games, and this helps to keep them out of mischief. It is said that there has been practically no quarrelling among them. The Superintendent of the Institution has not been particularly successful in keeping in touch with the youths released from there. Writing on this subject, he says : "Some who live near the Institution visit us occasionally and we are able to keep in touch with a few by correspondence. It is regretted that we cannot keep in touch with more of them after they have been released, but it is no doubt owing to the fact that they want to be disassociated with all manner of prison life which would remind them of the past. We have a number of ex-prisoners living in Rangoon who never come to see us, and it can no doubt be attributed to the above reasons." The Superintendent mentions that the man, who instructs the boys in carpentry, also teaches them gardening. Eight or nine years ago, he was an inmate of the Institution. He has been employed there for over two years, and exerts a good influence over the boys.

41. *Buildings*.—The following are the important works completed during the year :—

1. *Thayetmyo*.—Raising the main enclosure wall three and a half feet.
2. *Mandalay*.—(*a*) Conversion of the existing mortuary into a store room.
   (*b*) Construction of an extra godown for dietary stores.
3. *Rangoon*.—An experimental two-seated latrine of the "Koraput" pattern used in Madras Jails.
4. *Alon Camp*.—(*a*) Quarters for a Sub-Assistant Surgeon and (*b*) a store room for dietary articles.
5. *Kyaikto*.—Additions and alterations to the Subsidiary Jail.

The following works were in progress at the close of the year :—

1. *Myaungmya*.—A sale room for manufactured articles.
2. *Taungdwingyi*.—Raising some of the walls of the Subsidiary Jail.

42. *Inspections*.—I was in charge of the Department throughout the year. Having been deputed to proceed to New Delhi, as the representative of the Government of Burma to attend the Conference held for the purpose of discussing the revision of certain rules of jail administration,

relating to the treatment of convicted prisoners and undertrials, Lieut.-Colonel R. E. Flowerdew, M.B., I.M.S., and later Major J. Findlay, I.M.S., carried out the current duties of my office from the 3rd to the 24th December 1929.

Excepting the jails at Akyab, Kyaukpyu, Sandoway (these three were visited early in January 1930), Tavoy, Mergui, Magwe, and the subsidiary jails at Taungdwingyi and Pakôkku (these five will be visited as early as practicable), all jails in the Province were inspected by me or by the Supervisor of Jail Industries in my behalf, the permission of the Local Government having been obtained in the year 1928 to his carrying out the inspection of the smaller district jails on my account. His Excellency the Governor paid a visit to the jails at Mandalay, Meiktila, Katha, Mogôk and Mônywa. The number of visits paid by officials was 359 against 349 in 1928. It is gratifying to notice that the number of visits by non-officials rose from 485 in the previous year to 632 in the year under review. Rangoon, the Presidency Jail, was supposed to have been visited only twice by non-official visitors; but as a matter of fact several visits were paid but no note of them was made in the Visitors' Book. Myingyan was visited eleven times, Bassein fifteen times, and Thayetmyo seventeen times. Of the district jails, where visits were infrequent may be mentioned Moulmein three, Paungde five, Shwebo six, Tavoy and Shwegyin eight each.

43. *Audit of Accounts.*—The Supplies Accounts of seven central jails, the Manufacture Accounts of 25 jails and the warders' increment registers of 26 jails were checked by the officers of the Audit Department, the accounts of the two latter categories maintained at Prome, Paungde, Maubin and Magwe being audited twice during the year. All the accounts were reported to have been kept satisfactorily with the exception of those at Insein and Yamèthin where a want of system and slackness on the part of the staff were disclosed. It is a significant fact that a marked improvement has been shown as anticipated last year. Every item of the audit objections is carefully gone into and steps are taken to instruct the subordinates responsible in the upkeep of accounts.

44. *Jail Revisory Board.*—This Board continued to function on the same lines as in the previous year. Its operations have now extended over six years. The number of cases considered by the Board during the year was 2,612 and the results are given below :—

Recommended for conditional release	864
Recommended for Special Remission within the powers of the Inspector-General of Prisons	192
Recommendations withdrawn owing to objections by the District Magistrates	60
Cases postponed for future consideration	58
Finally rejected	1,230
Cases still under reference to District Magistrates	198
Released, died, etc., before final decision	10
Total ...	2,612

The total number of prisoners released on conditions since 1923 is 3,503, *i.e.* 334 habituals and 3,169 casuals. These figures include 1,188 released in the year under review, *viz.* 1,177 casuals and 11 habituals. One hundred and twelve prisoners out of these have so far had their remissions cancelled, either for breach of conditions or for fresh offences. The percentage of prisoners returned to jail to the total number released conditionally on the recommendation of the Board since 1923 is 3·20. The percentage of reconvictions amongst the habitual class is 14·07, while that amongst casuals works out to only 2·05.

During the year, sixty-six meetings were held by the Revisory Board. I desire again to place on record my high appreciation of the services rendered by the members of the Board, both official and non-official, who, notwithstanding the heavy demands on their time, cheerfully attended the meetings and afforded helpful advice in dealing with the prisoners' cases considered by the Board.

45. *Release of Prisoners under the Ticket-of-Leave Scheme.*—From the 1st January to 24th February 1929 ticket-of-leave labour was employed in the Taungdwingyi Subdivision of the Magwe District on the construction of the western arterial trunk road. On the 25th February 1929, the Camp was removed to the Pyinmana Subdivision of the Yamèthin District, where the prisoners were employed on earth work for the Public Works Department. The work was carried on for close on nine months when it was stopped owing to the locality being malaria stricken and nearly all the prisoners falling ill. On the 15th November 1929 the Camp was moved to the Daungthai Village of the Magwe District where the prisoners are still employed under the Public Works Department in the construction of the Magwe-Yenangyaung Road.

Particulars regarding the disposal of prisoners released under the Ticket-of-Leave scheme are given below :—

Number remaining on 1st January 1929	306
Number of conditionally released prisoners received ...	318
Total ...	624
Number released on expiry of sentence	260
Number of escapes	107
Number remanded to jail	24
Number of deaths	8
Total ...	399
Number remaining at the close of the year	225

The daily average for the year was 262.

In explanation of the large number of escapes, the Deputy Superintendent in charge of the Camp writes that most of the absconders were new arrivals who appear to have volunteered for ticket-of-leave employment solely with the object of escaping. The majority of them have been recaptured. In court, they pleaded that they escaped because they were longing to see their families. A few of the old stagers who escaped were work shirkers who did not earn enough to live on. Bad attacks of malaria at Pyinmana accounted for six deaths ; there was one fatal case of double pneumonia and one prisoner was accidentally drowned. Except for the epidemic of malaria—418 were treated for this disease—the health of the prisoners may be said to have been good. The Camp is not lacking in means for recreation. After roll call, on every alternative night, music is indulged in, the instruments used being Burmese drums, banjos and violins.

In the Camp there are three marble statues of the Lord Buddha, these being enshrined in a decorated pandal, and here the men pray every night. The *Pongyis* who come to the Camp are provided with food. Many other charitable works are reported to be performed by the labourers, the expenditure involved being voluntarily met from their earnings.

The most satisfactory feature of the year has been the entire absence of crime committed by the conditionally released prisoners; this is largely due to the efficient management and keen interest taken in his charge by the Deputy Superintendent, U Kin Shu, A.T.M.

46. *First Aid Classes.*—At the Insein Central Jail, thirty-two classes were held. Only eighteen prisoners underwent a course of training but none appeared for the examination. At the Rangoon Central Jail two classes were held, *viz.* one for the nine Cadet Jailors and the other for thirty-nine prisoners, but it is said that none could qualify for a certificate and that no time is available for delivering lectures to the warders. Only one class was held at the Thayetmyo Central Jail where 19 prisoners underwent training, but no examination was held. At the Akyab District Jail nine lectures were delivered ; two jailors and six prisoners underwent training, but none sat for the examination. The Medical Officers of the remaining eight jails, who were instructed to arrange for training in "First Aid" being carried out, have given various reasons as to why no classes were held, for example no jailors, warders and convicts came forward to undergo training, constant changes among the Medical Officers and Sub-Assistant Surgeons militated against the training being carried out, the warder staff has no leisure and the prisoners no inclination to undergo a course of training, etc. It is hoped that during the year 1930 the Medical Officers of the Jails concerned will, as desired by me, make an effort to arrange for a good number of jailors, warders and prisoners undergoing a proper

course of training in "First Aid" so that all or nearly all, appearing for the examination, may be granted the usual certificates.

47. *Establishment.*—There has been no change in the system of supervision. I had in 1928 submitted proposals for the constitution of a service of whole-time Superintendents of Jails, but Government were not able to sanction the scheme for want of the necessary funds. As stated in my report for the year 1928, the appointment of whole-time officers as Superintendents of Jails, would not only improve the administration of prisons in the province, but would also considerably increase the earnings of the prisoners and pay the cost of any additional commitments involved as a result of the appointment of whole-time Superintendents. The increase in the cash sales and the decrease in the maintenance cost per prisoner, in spite of the rise in the daily average population, have justified the appointment of the Supervisor of Jail Industries. It is part of this officer's duties to take measures for the improvement ot jail industries and for the economical purchase of supplies and raw materials. All Superintendents have made praiseworthy efforts to improve the condition of their charges and to increase the manufacture receipts of their jails. No additional staff was sanctioned for my regular office establishment during the year and as usual, my clerks were obliged to put in long office hours and to work on Sundays and holidays. They nevertheless worked cheerfully and assisted me ungrudgingly.

48. The satisfactory features of the year are (1) a fall in the daily average number of prisoners of all classes, (2) there were no escapes from inside jails, (3) a decrease in the number of offences, especially those dealt with by criminal courts, (4) a fall in the number of whippings as a jail punishment, (5) overcrowding, among convicts, which was constant since the year 1926 ceased from October 1929, (6) a reduction in the average cost of dieting, (7) vast improvement in the gross and nett cash receipts on account of jail manufactures and extramural employment.

The unsatisfactory features of the year are (1) an increase in the daily average number sick, (2) a rise in the number of deaths.

P. K. TARAPORE, *Lieut.-Colonel, I.M.S.,*
Inspector-General of Prisons, Burma.
